

SUSTAINABILITY

GAMAJET®

SUSTAINABILITY THROUGH THE TRIPLE BOTTOM LINE

PEOPLE - PLANET - PROFIT

For our customers

PEOPLE

Gamajet machines allow for customers to ensure the upmost safety is taken when cleaning tanks through the elimination of confined space entry and the limiting of fall potential. Gamajet machines can be lowered into tanks with hazardous gases and environments that are potentially fatal to employees. When a Gamajet is implemented the dangers involved in such activities are nearly eliminated, allowing for safer work environments and peace of mind – priceless.

PLANET

Gamajet machines allow for customers to obtain the sustainable goals designed to protect our world. Through tank cleaning optimization, customers experience water savings nearing 80% and energy savings averaging around 85%. As a result greenhouse emissions and the overall impact on our environment is significantly reduced. Tank cleaning is typically the number one culprit in water waste. Many customers have obtained their companywide water savings goals through this simple implementation.

PROFIT - COMBINING GROWTH AND SUSTAINABILITY

Gamajet machines allow for significant savings of expenditures such as time, chemicals and other operating costs. In addition, the significant savings in time allow for an increase in production and a recovery in revenue resulting in an honest profit. As a result, customers can maintain the former objectives of positively impacting the community and decreasing the negative impact on the environment in perfect harmony with the final bottom line.

COMBINING GROWTH AND SUSTAINABILITY

PEOPLE - PLANET - PROFIT

Our Responsibility

PEOPLE

Gamajet has taken on the responsibility of ensuring our employees not only work in a safe environment but are also given an equal opportunity. This has been done through the development of a safety committee which organizes and executes safety protocol as well as the employment of disabled personal. Gamajet has sought out specific tasks that have allowed for the hiring of autistic employees, as well as education seminars to spread the awareness. In addition, Gamajet ensures a positive, stress free, team environment, full of employees that regularly volunteer not only time but skills to enrich the surrounding community, resulting in very low turnover. Gamajet has and will continued to hire new employees, every year, even in the current national economic state.

PLANET

Gamajet recycles all scrap metal including stainless steel, aluminum, brass and carbon steel, as well as separates and recycles all cardboard. Oil and grease used in all repairs are not only recycled but also limited to a food grade grease for biodegradability. In pertaining to energy use, Gamajet received a PA Department of Energy grant for energy savings allowing for the replacement of all lights, with energy efficient lighting, as well as put a variable frequency drive on all of our pumps. The lights in the warehouse were zoned, allowing them to be turned off when not in use, reducing energy use by 50%. We have also added insulation to the exterior of our building and instilled rules for turning off computers and monitors when not in use. Plant wide electronic thermostats were installed to save energy during non-business hours by allowing the raising/lowering of the temperature during off peak times. Energy consumption was thus reduced by 40% overall. In addition, Gamajet refuses to run tests on any non-food grade substances, that could potentially harm the ecological environment of the community, including the running stream down the street.

PROFIT - COMBINING GROWTH AND SUSTAINABILITY

As a highly passionate company, constantly staying ahead of technology and searching new needs and solutions, Gamajet has has continued to grow on a yearly bases, hiring new employees and regularly giving back to the community. This is a direct result of our responsibility to the people and the environment. Although Gamajet is a small, privately held company it is our responsibility to ensure that our daily operation enriches the community and the environment. Allowing us to grow in a honest and sustainable manner.
