

# GAMAJET®

The World Leader in Tank Cleaning Technology

## OPTIMIZE YOUR IMPACT!

Add our **NEW** high impact nozzles to your Gamajet and increase your impact by **40%**.

Gamajet's new High Impact Nozzles give the Gamajet E-Z8 and IV GT cleaning machines an additional boost for taller and/or longer tanks and trailers. Our engineers extended the length of the standard nozzles and added sophisticated stream-straightening technology to significantly reduce the turbulence within the nozzle creating a more focused and directed jet stream. As a result, the High Impact Nozzles provide an additional 40% more impact upon the interior of the tank, than the standard nozzles.

Our High Impact nozzles are easily interchangeable and made from the same heavy duty stainless steel as your Gamajet, allowing you to replace your standard Gamajet nozzles in less than a minute, without affecting the integrity and durability of the machine.

With the ability to increase the impingement cleaning from your Gamajet in a matter of seconds, your tank cleaning process will become even more effective and efficient. Allowing you to reach the far ends of your tanks with all the force you need to get it clean.
